The importance of good water

water is the source of all things. The first basis of good health is to drink good water

"The most important cause of each person's health and longevity is in drinking water"

- Joseon's righteousness Huh Jun <Donguibogam>

"Over 80% of human diseases are related to drinking water"

- Klaus Topfer <UNEP Secretary General>

There are many minerals that are necessary for the human body

such as calcium, magnesium, sodium, potassium, zinc, phosphorus, iodine and selenium, Mulmaru, which means the peak of the far horizon where the sea and sky meet. It also contains a lot of silicon, which is known to enhance bone density, improve blood vessel, and inhibit aging.

Ingredient comparison between Mulmaru vs. World famous water

Mulmaru VS World famous water

Mulmaru is made up of 99.999% potassium carbonate and 0.001% potassium carbonate

country / name	Ca	Mg	Na	K	Si	pH
	65~103	12~14	16~24	0.4~3.4	12~25	7.3~7.5
FRANCE / EVIAN	80	26	6.5	1	?	7.2
GERMANY / NORDENAUER	54.3	12	3.8	1.2	?	8.12
FRANCE / LOURDES	44.5	3.7	3.6	0.8	?	7.9

Excerpt: The figures of Mulmaru are the result of multiple inspection agencies.

The figures of other companies are based on the 2004 KBS1 Secrets of Saenglobyungsa (Nordenauer, Lourdes).

Excerpt from 61 water notebooks of a water sommelier (Evian)

Mulmaru receives praise from the press

PRESS RELEASE

스포츠조선 Sports Joseon

The standard of good water defined by the World Health Organization (WHO) is that there should be no harmful substances such as pesticides heavy metals / bacteria, etc. Secondly it should contain minerals such as calcium / magnesium / sodium. , And third, weakly alkalic at pH 7.2-7.5. The national experts in water, such as Baek Woo-Hyun, honorary professor and dean of HanManSo at Daejin University, and Min Jae-Ho, professor at Gwangju Women's University, analyzed the ingredients of 'Mulmaru' and concluded that the contents of minerals, dissolved oxygen, and clusters exceeded

the conditions of good water defined by WHO, confirming its international quality

The answer of the press and experts to the best water that most well-suits the good water conditions of WHO was also Mulmaru

Mulmaru ingredient

Ingredient of Mulmaru, nature's weak alkalic water

PH 7.3~7.5

Weak alkalic water is above pH 7.0
Our body's blood concentration 7.4 (optimal)

Calcium

65~103 mg

Formation of bone and teeth,
inhibits blood coagulation
and aids in muscle control and mental stability

Potassium

0.4~3.4 mg

Interacts with sodium to adjust intracellular
balance and aid neurotransmission

Magnesium

12~14 mg

Allows good permeability of calcium i
nto the body and controls s
mooth blood flow

Silica

12~25 mg

Strengthens blood purification
blood vessels and immunity

Sodium

16~24 mg

Adjust the body's water balance,
prevent blood pressure from rising,
and help with fatigue

Total mineral

105~169 mg

selenium promotes growth and strong antioxidant
activity, and zinc activates hormones

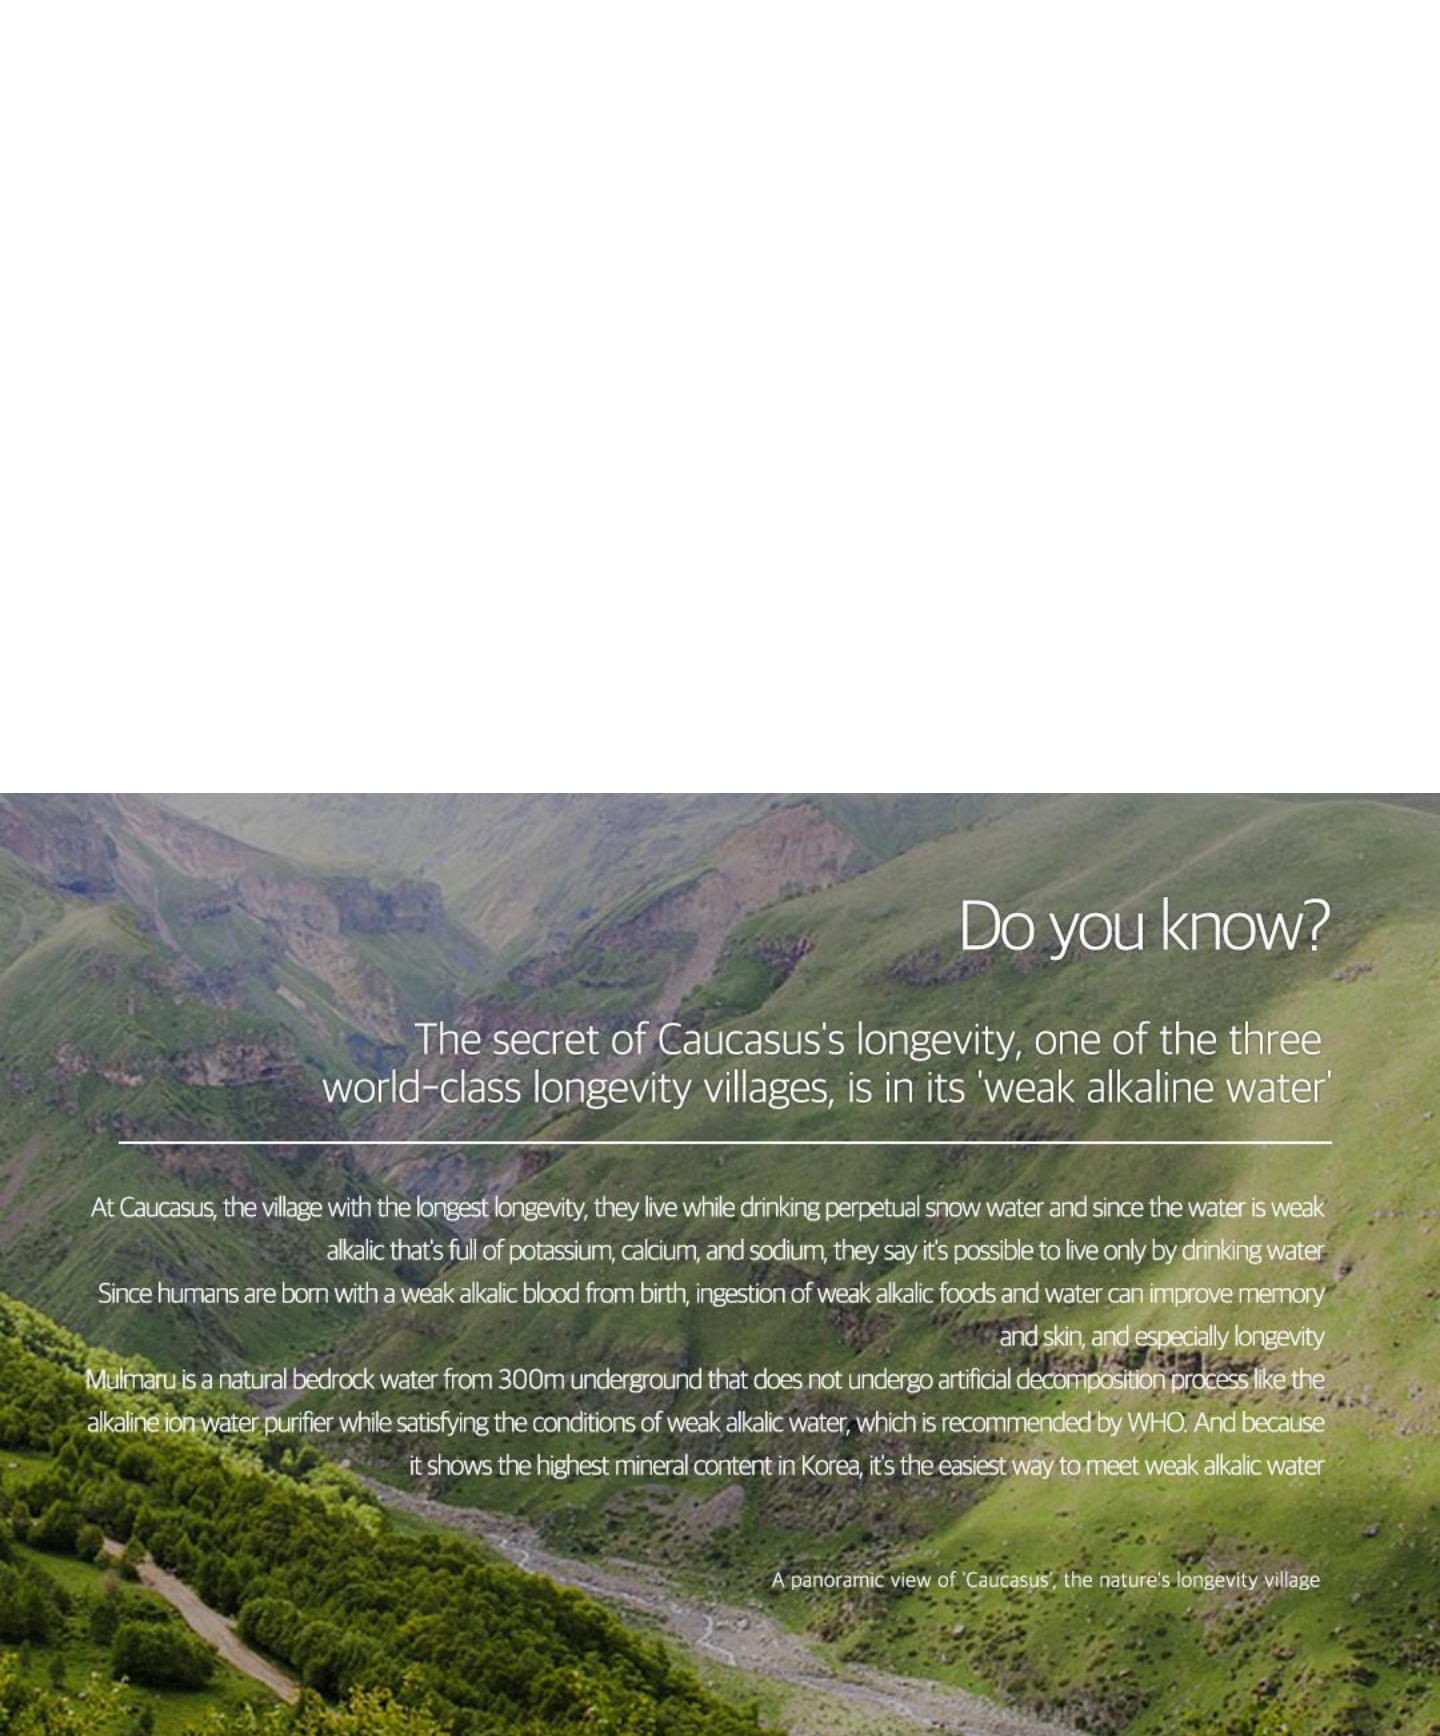

Compare mineral-rich Mulmaru

Why Mulmaru?

Because it is nature's weak alkalic water that isn't created chemically

Mulmaru also contains the essential minerals of selenium iodine zinc vanadium and chromium in addition to the above minerals. These essential minerals are used to improve diabetes blood sugar control and cardiovascular disease

Do you know?

The secret of Caucasus's longevity, one of the three world-class longevity villages, is in its 'weak alkaline water'

At Caucasus, the village with the longest longevity, they live while drinking perpetual snow water and since the water is weak alkalic that's full of potassium, calcium, and sodium, they say it's possible to live only by drinking water. Since humans are born with a weak alkalic blood from birth, ingestion of weak alkalic foods and water can improve memory and skin, and especially longevity. Mulmaru is a natural bedrock water from 300m underground that does not undergo artificial decomposition process like the alkaline ion water purifier while satisfying the conditions of weak alkalic water, which is recommended by WHO. And because it shows the highest mineral content in Korea, it's the easiest way to meet weak alkalic water.

A panoramic view of 'Caucasus', the nature's longevity village
